SKIN CONTACT

Skin contact aka, orange wine, is made from white grapes vinified in a similar manner to red wine. Skin contact can turn up the volume of the varietal. Adding texture, tannin, and unique varietal aromatics.

Amphorae are essentially clay jars used to ferment and or age wine. An ancient tradition recognised as providing a pure expression of grape and place, rather than artifact.

ETNA

Mt Etna to be precise, situated on the North East coastline of Sicily. A stratovolcano and stands at just over 3,300m above sea level. Etna is one of the world's most active volcanoes, in an almost constant state of activity.

*Winemakers have been at the mercy of lava flows for centuries. The rewards outweigh the risks. The takeaway over time offers the soils unique growing conditions for some of the **HOTTEST** wines on earth.*

The focus centers around the indigenous red variety Nerello Mascalese and indigenous white variety Carricante.

These energetic, well-structured wines, bring a sense of Sicily to your table.

Enjoy

ITALIANATE STYLES

Local expressions of Italian native grape varieties are among the most exciting idioms of Australian wines to date; coaxing a great deal of international attention and accolades.

As the local producers grow older with these varieties, they find a better understanding, appreciation and love for wines like these, better attuned to a dry, Mediterranean climate and old soils; without the need for regular water and over tweaking in the winery.

Expect structural poise, sufficient fruit and a layered, savoury length. THE future!
